

PROFILE

Software Engineer with 3 years of experience building scalable, multi-tenant Django applications and REST APIs. Strong focus on performance optimization, payments, background jobs, and production-ready systems used by real users.

TECHNICAL & SOFT SKILLS

Backend: Python, Django, Django REST Framework

Frontend: React, TypeScript, JavaScript, TailwindCSS

Databases: PostgreSQL, MySQL

Infra & Tools: Docker, Celery, Redis, Git, REST APIs, Postman, Jira, AWS (Foundational knowledge)

EXPERIENCE

- Software Engineer – Codelynks Software Solutions | Kakkanad, Kerala | May 2023 – Present**
- Built scalable web apps using **Django**, **React**, and **TypeScript** with modular architecture.
 - Designed and implemented **multi-tenant schemas** for client-specific domains.
 - Optimized REST APIs & PostgreSQL queries, improving performance via caching and tuning.
 - Collaborated with frontend/design teams to turn **Figma** designs into production UIs.
 - Integrated React with Django backend using Reactivated for seamless data flow.
 - Assisted in AWS-based application deployments and server maintenance activities.
 - Worked with EC2 instances and basic cloud infrastructure operations under senior guidance.
- Intern – Luminar Technolab | Kakkanad, Kerala | Oct 2022 – May 2023**
- Assisted in backend logic & responsive frontend development using Django and React.
 - Worked on **model design**, **API creation**, and **user authentication systems**.

EDUCATION

B.Tech in Computer Science & Engineering

Ilahia College of Engineering and Technology, Muvattupuzha | 2018 – 2022

KEY PROJECTS

Exam Management Platform (Backend Lead | Django, DRE, PostgreSQL, Celery, Redis)

- Led backend development of a **multi-tenant exam platform**, designing scalable REST APIs for exams, question banks, students, credits, payments, and analytics.
- Implemented **JWT authentication**, **RBAC**, and integrated **Razorpay** with webhook verification and automated payment workflows.
- Built **Celery-based background processing** for notifications and scheduled tasks.
- Developed performance analytics, skill recommendations, and optimized API/database performance through query tuning and indexing.

E-Commerce Platform (Full-Stack Contribution)

- Developed **multi-tenant backend services** and REST APIs using Django and Django REST Framework.
- Integrated **Wagtail CMS** to enable dynamic content and admin management.
- Designed and implemented frontend features using **React** and Figma-based workflows.
- Diagnosed and resolved critical production issues while improving application performance and data flow reliability.

Quotation App (Frontend Rebuild | React + Next.js)

- Rebuilt core application modules using **React** and **Next.js**.
- Refactored legacy code to improve **maintainability and scalability**.
- Enhanced API integration workflows and optimized user experience across key application flows.

Freelance Projects (Full-Stack | Django + React)

- Developed and deployed a responsive company website using React and TailwindCSS.
- Translated business requirements into production-ready features and user interfaces.
- Collaborated directly with stakeholders to gather requirements and deliver solutions.
